Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 9, 16, 18, 24 and 31-36 are presented for examination.

Applicants' amendment and response filed March 24, 2008 have been received and entered.

Allowable Subject Matter

Claims 31-34 are allowable.

Claim Objections

Claims 35 and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 16 and 24 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Meguro et al. (4,687,777) in view of Windholz et al. (PTO-1449), all

Art Unit: 1614

of record, for reasons of record as set forth in the previous Office action dated September 24, 2007 at pages 2-3 as applied to claims 16 and 24.

Applicants' remarks regarding the prior art, Meguro et al. (4,687,777) does not teach the instant active agent, pioglitazone, used to improve or treat acidosis are not persuasive since applicants' specification discloses unexpected results in the combination of pioglitazone or a salt thereof with insulin in an animal model with NIDDM (type 2 diabetes) only. The instant specification does not teaches the any unexpected results or experimental data showing diabetic acidosis is in a mammal with type1 diabetes since the term "diabetic acidosis" incorporates type 1 and type 2 diabetes.

The rejection made under 35 USC 103(a) is adhered to.

Claims 16 and 24 are not allowed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. 2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 9 and 18 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Meguro et al. (4,687,777), of record, for reason of record as set forth in the previous Office action dated September 24, 2007 at pages 4-5 as applied to claims 9 and 18.

Applicants' remarks regarding the prior art, Meguro et al. (4,687,777) does not teach the instant active agent, pioglitazone, used to improve or treat acidosis are not persuasive since applicants' specification discloses unexpected results in the administration of pioglitazone or a salt thereof in an animal model with NIDDM (type 2 diabetes) only. The instant specification does not teaches the any unexpected results or experimental data showing diabetic acidosis is in a mammal with type1 diabetes since the term "diabetic acidosis" incorporates type 1 and type 2 diabetes.

The rejection made under 35 USC 103(a) is adhered to.

Claims 9 and 18 are not allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
